

DATA SHEET

# Vision boards to value streams

**Virtusa PLM can drive measurable growth  
for your provider management.**

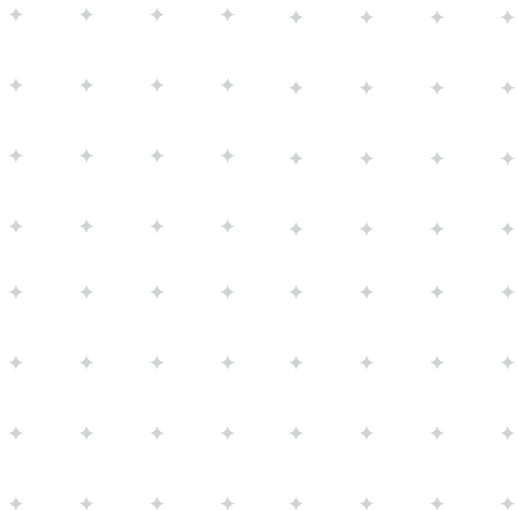

Provider networks are more dynamic and complex than ever. Disconnected systems and manual workflows introduce friction that stalls growth and creates enterprise risk, resulting in extended credentialing cycles, inaccurate directories, and unstable networks. This creates a compliance gap, increasing exposure to audit risks and CMS transparency mandates.

Virtusa's **Provider Lifecycle Management (PLM)** solution transforms this complexity into a strategic advantage. We provide a unified, intelligent platform that integrates **generative AI (genAI), RPA, and real-time intelligence** across the entire provider lifecycle—from recruitment to servicing—helping organizations address compliance gaps, reduce audit risk, and meet CMS transparency mandates with current, accurate data.

# Why clients are choosing Virtusa PLM

## To build a predictive, compliant, and efficient network.

With PLM, clients can unlock significant gains in speed, governance, and transparency throughout the provider lifecycle.

### Accelerate time-to-value

Streamline operations with automated workflows to launch faster and engage members sooner.

### Ensure regulatory assurance

Maintain compliance with embedded support for CMS-0057-F, OBBBA, and ACA, reducing remediation and audit risk.

### Deliver executive visibility

Gain real-time insight into network adequacy and throughput with instant dashboards.

### Enhance operational agility

Rely on a configurable framework that adapts to shifting policies and care models seamlessly.

# Capabilities

**7 modules. One source of truth.**

## **Our modular platform automates:**

Geospatial recruitment, genAI contracting, RPA credentialing, and MDM-driven Golden Records.

We ensure compliance with CMS and the No Surprises Act via AI-governed directory and roster management.

**Virtusa's integrated tech ecosystem eliminates manual friction to power a seamless, intelligence-driven architecture.**

## **GenAI, RPA, and BPM**

work together to minimize manual handoffs, accelerating provider onboarding and streamlining operations.

## **Our FHIR-enabled platform**

enables seamless data exchange, ensuring interoperability across diverse healthcare systems for improved collaboration.

## **Policy-driven logic**

automates rapid updates to meet state and federal mandates, reducing delays and maintaining compliance.
